36
mm

The chunky system 02 range is highly flexible and functional as either desk mounted or floor standing screens, to help create a stylish environment.

Styling

All panels are upholstered with heat bonded foam backed fabric as standard - available in a vast range of colourways to match your scheme. Alternative panel faces are available, for example high pressure laminate, real wood veneer and acrylic finishes.

Management Rail

125mm or 75mm deep double-sided management rails. 25mm slot pitch allows suspension of accessories and flat screen support arms. They can be used as singles or in multiples, located in any position as required.

Desk Mounting

Can be fitted as shared top screens or face mounted screens acting as screen and modesty panel. Standard screen mounting brackets are available, alternative brackets can be manufactured to suit customers own requirements.

Wave and Arc top trims

Pre-formed top trim profiled with a 200mm reduction in height are available.

Floor Standing Screens

Floor Standing Screens can be manufactured to any size, depending on core material and fabric limitations.

Specification

- System 02 screens are 36mm thick.
- Floor standing screen panels are constructed using plywood surfaces standard to both faces, cladding an MDF framework.
- Wherever possible the desk mounted screen core panel is removed to reduce weight.
- The screen is constructed using aluminium extrusions as a structural means of screen to screen connection.
- The simple means of linking allows ease of connection even when screen heights differ.
- Aluminium trims are stove powder coated.
- The double-sided management rail is silver anodised.
- Available as an acoustic screen.
- System 02 screens have been tested and comply with the following standards - EN 1023-1:1997, EN 1023-2:2000 and EN 1023-3:2000.

High quality aluminium frame allows for endless connectivity

Huge range of colour and finishing options available

Expert integration with your systems and space

When you want to design the screen your way
