

Sleek 5mm unframed acrylic screens manufactured in a choice of colours and sizes to match your scheme.

Blade screens provide an aesthetic alternative to systems screens. If you don't need to link screens together or hang anything from them, blades could be just the thing for you. Blades are perfect for touchdown areas or hot-desking where functionality of the screen is less important. They are fantastic for creating something unique and personal to an individual or corporate brand.

Specification

- 5mm profile
- 1200mm, 1400mm, 1600mm, 1800mm and 2000mm wide.
- Height 460mm with 360 above desk height as standard.
- Alternate dimensions are available upon request.
- Available in a multitude of colours and finishes including solid, clear, tinted or frosted.
- Outstanding clarity and exceptional durability.
- All acrylic products comply with the requirements of the European Union's RoHS Directive 2002/95/EC regarding the concentrations of heavy metals and heavy metal compounds.

Choose from four different types of surface finish
