06

Our 60mm aluminium framed System 06 is incredibly flexible. Use it as a cubicle to create personal work space, divide areas into meeting spaces or even as a wall for common areas.

Styling

All panels are upholstered with heat bonded foam backed fabric as standard - available in a vast range of colourways to match your scheme. Alternative panel faces are available, for example high pressure laminate, real wood veneer and acrylic finishes.

Flexibility

System 06 is a simple modular product which enables a variety of space division options using standard height and width combinations. It is perfect for creating individual work areas, meeting spaces and divisional walls.

Specification

- System 06 screens are 60mm thick.
- Internal void offers substantial room for acoustic material if required.
- Designed to accommodate power and data if required.
- The screen is constructed using aluminium extrusions as a structural means of screen to screen connection.
- The simple means of linking allows ease of connection, even when screen heights differ.
- The fabric screen is constructed using MDF panels with face applied 2mm flame bonded foam backed fabric, retained within the aluminium frame.
- Acrylic screens are constructed using a 3mm acrylic panel retained within the aluminium frame.
- Levelling feet allow for 25mm height adjustment.
- Aluminium trims are stove powder coated in standard colours, White RAL 9003 and Silver RAL 9006 with added sparkle.

High quality aluminium frame allows for endless connectivity

Huge range of colour and finishing options available

Expert integration with your systems and space

When you want to design the screen your way
